COURSE: PROJECT CONCEPT PAPER

Concept Paper for Computer Programming Projects

Formatting Guidelines:

Font: Times New Roman

Font Size: 12 pt

Spacing: 1.5 lines

Margins: 1 inch on all sides

Title of the Project

[Your Project Title Here]

Student Information

Name: [Your Name Here]

Student No: [Your Student No Here]

Course: [Your Course Name/Code Here]

Instructor: [Your Instructor's Name Here]

1. Introduction

This project, titled [Your Project Title Here], aims to address [specific problem or need] by

2. Purpose Of the Project

developing a [brief description of solution]. [brief description of larger project, if applicable].
This proposal aligns with

The project addresses the issue of [specific issue]. This issue is significant because [reason why the issue matters]. Our approach to solving this problem involves [brief description of the method or technology], which we have chosen due to [reasons for choosing this approach]. The project will specifically benefit [target population and number], achieving [specific public good] and providing value to both the community and the College by [how it benefits both].

3. Project Activity

This project will involve the following activities:

Activity 1: [Detailed description of activity]

Activity 2: [Detailed description of activity]

Activity 3: [Detailed description of activity]

Our approach is novel because [unique aspects of the approach], making it deserving of special attention. We will collaborate with [name of other organizations], who will [specific roles of collaborators]. For example, [specific organization] will handle [specific task], while we will focus on [another task].

4. Outcomes

The specific outcomes of this project include:

Outcome 1: [Description of outcome]

Outcome 2: [Description of outcome]

We will evaluate the success of these outcomes through [evaluation methods]. Both formative and summative assessments will be utilized, including [specific evaluation techniques or metrics].

5. Technical Feasibility

Our project is technically feasible because [reasons why the project is technically viable]. The technologies and tools we plan to use, such as [specific tools, languages, or frameworks], are well-established and suitable for this project. We have assessed potential challenges such as [specific technical challenges], and have devised strategies to mitigate these risks, including [specific mitigation strategies].

6. Budget

The total project cost is estimated to be [total cost. Break down the costs

7. Closing

Your closing statements

Note to Students:

Ensure clarity and conciseness in your concept paper.

Follow proper citation practices for any referenced material.

Review your paper for grammatical accuracy and coherence before submission.

Seek feedback from peers or mentors to strengthen your proposal.
